

Architas MA Active Reserve Fund Factsheet

This factsheet is for information purposes only and is not designed to provide advice on the suitability of an investment for your personal financial situation. It has been produced to provide you with information on the fund including fund objective, where the fund invests and past performance. **If you have any questions regarding the information within this factsheet, you are recommended to speak to a financial adviser.**

Investment Objective and Policy Summary. The Fund aims to achieve long term growth from a combination of income and capital growth. The Fund aims to achieve the investment objective through investment primarily in fixed income securities, cash and near cash and property indirectly through units in collective investment schemes and (in the case of investment in fixed income securities, cash and near cash) directly by selected sub-advisers. The Fund may also invest in other transferable securities, money market instruments, warrants, derivatives and deposits directly and/or indirectly through units in collective investment schemes. Use may be made of stocklending, borrowing, cash holdings, hedging and other investment techniques permitted in the COLL Sourcebook. Any investment using derivatives adheres to the guidance laid down regarding efficient portfolio management in order to reduce risk; to reduce cost; or to generate additional capital or income in a manner consistent with the Fund's risk profile. This Fund is a fund of funds.

Each fund can invest entirely in units of collective investment schemes. Source: State Street Banque SA. The Fund performance figures take into account the annual management charges, but not the initial charges that would be payable. These charges have the effect of reducing the past performance figures shown above. Figures are on a single pricing basis and assume income is reinvested. Past performance is not a guide to future performance. The value of investments and any income from them can go down as well as up and is not guaranteed. This may be due to market fluctuations or changes in exchange rates, or both. This means that investors may not get back the original amount invested.

1. Yield and fund information is for the unit class A Acc.

2. The performance shown is for the A Acc share class however this was not launched until 31 July 2012 so any performance before this time is from the R Acc share class.
