

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Architas MA Passive Progressive Fund

a Sub-Fund of **Architas Multi-Manager Global Solutions ICVC**
Share Class R Net Accumulation (GB00B3CQK172)

This Fund is managed by Architas Multi-Manager Limited, part of the AXA Group

Objectives and Investment Policy

The objective of the Fund is to seek to achieve a return for investors over the medium to long term based on a combination of capital growth and income and with an above median volatility level through exposure to a diversified range of asset classes.

The Fund aims to provide a return on your investment by gaining exposure to a global portfolio of property, cash and various types of investment in companies and governments, the relative proportions of which ("asset allocations") are determined by a model provided by eValue Investment Solutions ("eValue"), a third party company that estimates the riskiness of investment types by modelling how they might be likely to behave over certain periods of time.

eValue asset allocations each reflect one of seven risk profiles, ranging from level 1, which reflects the risk of holding cash in bank accounts, to level 7, which is the riskiest profile in their range. The Fund is ranked at level 5, based their predictions over a 15 year period.

The eValue model works differently from that used to generate the Synthetic Risk and Reward Indicator shown elsewhere in this document, so the two rankings may differ.

The Fund gains exposure by investing, wherever practicably possible, in 'passive' funds, which are investment funds that aim to track the performance of various financial indices. We select these underlying passive funds on the basis of their efficiency at tracking their particular indices.

Underlying funds may invest in a wide range of financial instruments, including shares, tradable debt (bonds) issued by companies,

governments and other institutions, debt instruments which can easily be converted into cash (money market instruments), freely transferrable rights to buy other investments at a future date (warrants) and financial contracts that derive their values from those of other investment instruments or indices (derivatives). The underlying funds may invest in the UK or overseas, including in emerging markets.

The Fund may also invest directly in the above financial instruments when there are specific benefits in doing so. The Fund may use derivatives with a view to: generating investment returns; reducing risk or costs; or generating additional capital or income in a manner consistent with the Fund's risk profile. The Fund may use derivatives for investment purposes as well as for Efficient Portfolio Management. For example, where it may not be economical or efficient to use investment funds, the Fund may use derivatives to adjust its exposure to foreign currencies or asset classes, or to track the performance of particular financial indices. The Fund may not invest in derivatives if to do so would be inconsistent with the Fund's risk profile.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

We will automatically include income from the Fund's investments in the value of your shares.

You may sell your investment on a daily basis.

The base currency of the Fund is GBP.

Risk and Reward Profile

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free.

The risk and reward category may shift over time and is not guaranteed.

Your investment in the Fund is not guaranteed. The Fund is invested in financial assets and instruments and uses financial techniques that are subject to levels of variation, that may result in gains or losses.

Funds of category 4 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The shares of a fund of category 4 might be subject to low to medium price fluctuations based on the historical volatility observed.

The following are additional risks not covered by the risk and reward category:

Credit Risk - Bonds: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Fund of Funds - Liquidity Risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

Index Tracking Risk: The underlying funds' performance may not exactly track that of their Indices. This may result from: market fluctuations; changes in the composition of the Indices; sampling techniques used; transaction costs; or other administrative expenses.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year

Ongoing charge	1.18%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your financial adviser or distributor.

The ongoing charges figure is based on the expenses for the twelve month period ending 31st December 2018. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges, please see the section entitled "Fees and Expenses" in the Fund's prospectus which is available on request free of charge from the manager.

Past Performance

Past performance is not a reliable indicator of future performance.

The past performance shown here takes account of ongoing charges. The entry/exit fees are excluded from the calculation of past performance.

The Fund started to issue shares in November 2008.

Past performance has been calculated in GBP and is expressed as a percentage change of the Fund's net asset value per share at each year end.
