

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Architas Multi-Manager Diversified Protector 85

a Sub-Fund of **Architas Multi-Manager Protector Funds ICVC**
Share Class R Net Accumulation (GB00B6ZJPW05)

This Fund is managed by Architas Multi-Manager Limited, part of the AXA Group

Objectives and Investment Policy

The Fund seeks to achieve capital growth, whilst maintaining a share price that is at least equal to 85% of the highest share price achieved since inception of the Fund (the "Fund Protection Floor").

The Fund Protection Floor does not include any initial, switching or redemption charges, dilution levy or any taxes to which investors and/or the Fund may be subject.

There is no guarantee that the investment objective of the Fund will be achieved over any time period and investors should note that there is no capital protection guarantee and capital is therefore at risk.

The Fund is an actively managed fund of funds.

The Fund invests at least 70% of its assets in other funds (underlying funds), including funds which are traded on stock exchanges (investment trusts and exchange traded funds), other closed-ended funds, and funds managed by Architas or its associates.

The underlying funds will invest globally (including in emerging markets) in a range of asset classes and financial instruments including shares, debt instruments (bonds) including those which can easily be converted into cash (money market instruments), cash, freely transferrable rights to buy other investments at a future date (warrants), financial contracts that derive their values from those of other investment instruments or indices (derivatives) and deposits.

Underlying funds are selected principally on the basis of our assessment of their consistency of investment returns, the risks related to the strategy, the strength of the investment process and the stability of the underlying fund's management team.

The Fund may also invest directly in the above asset classes and financial instruments when there are specific benefits in doing so.

Further, the Fund may obtain indirect exposure to property and commodities through investing in closed-ended funds (such as Real Estate Investment Trusts (REITs) and investment trusts), shares and derivatives.

When investing directly in debt instruments, the Fund may invest in investment grade securities (that is, securities with a credit rating of at

least BBB- as rated by Standard and Poors, or Baa3 as rated by Moody's), or in non-investment grade securities.

The Fund may use derivatives to help achieve the investment objective (investment purposes) as well as to reduce risk or to manage the Fund more efficiently (often referred to as "efficient portfolio management"). Currently the Fund is not intending to use derivatives.

The Fund's investments are combined together in different proportions ("strategic asset allocation"). The Fund's strategic asset allocation will be driven by the Fund's Investment Manager's assessment of the balance of risk which the Fund will aim to maintain in order to achieve the investment objective. The Investment Manager will identify assets as "higher risk assets" and "lower risk assets" and will seek to achieve a blend which will vary over time. Typically shares, certain types of bonds, or exposure to property/commodities will be classified as higher risk assets, whilst certain other bonds, cash and near cash (money market instruments, deposits and money market funds) will be classified as lower risk assets.

In order to determine the blend of higher risk assets and lower risk assets, the Investment Manager uses an algorithm to calculate risk parameters based on market performance and volatility. The Investment Manager uses the risk parameters as a tool to manage the Fund's exposure to higher and lower risk assets, and has discretion to invest in differing proportions of higher and lower risk assets within these parameters. The closer the current share price moves downward towards the Fund Protection Floor, the greater the proportion of the lower risk assets held. Depending on market conditions, the Fund could at times be 100% invested in lower risk assets.

The Fund does not have a benchmark.

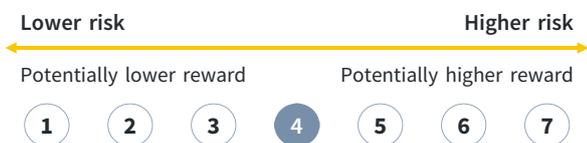

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

We will automatically include income from the Fund's investments in the value of your shares.

You may sell your investment on a daily basis.

The base currency of the Fund is GBP.

Risk and Reward Profile

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free.

The risk and reward category may shift over time and is not guaranteed.

Your investment in the Fund is not guaranteed. The Fund is invested in financial assets and instruments and uses financial techniques that are subject to levels of variation, that may result in gains or losses.

Funds of category 4 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The shares of a fund of category 4 might be subject to low to medium price fluctuations based on the historical volatility observed.

The following are additional risks not covered by the risk and reward category:

Capital Protection Risk: The Fund aims to provide some capital protection but does not provide a capital guarantee. In some circumstances the target protection level may not be achievable, for example if a counterparty becomes insolvent or, if market prices move too quickly against the Fund.

Credit Risk - Bonds: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Fund of Funds - Liquidity Risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year

Ongoing charge	1.39%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your financial adviser or distributor.

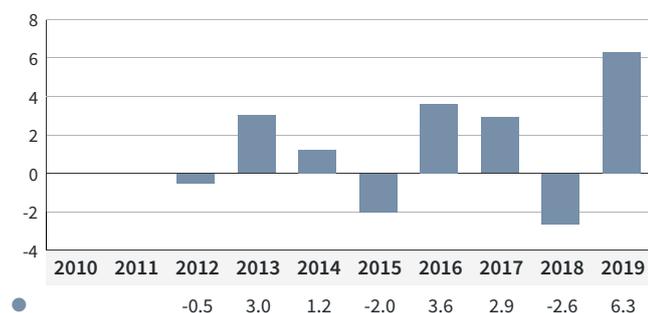

The ongoing charges figure is based on the expenses for the twelve month period ending 31st December 2019. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges, please see the section entitled "Fees and Expenses" in the Fund's prospectus which is available on request free of charge from the manager.

Past Performance

- Share Class R Net Accumulation (GB00B6ZJPW05)

Past performance is not a reliable indicator of future performance.

The past performance shown here takes account of ongoing charges. The entry/exit fees are excluded from the calculation of past performance.

The Fund started to issue shares in November 2011.

Past performance has been calculated in GBP and is expressed as a percentage change of the Fund's net asset value per share at each year end.
